CHAPTER 1

A System That Holds

A book becomes easier to maintain when its structure is expressed directly rather than simulated with manual spacing. This synthetic chapter shows the neutral PSE baseline for general prose.¹

1.1 Structure before decoration

A section introduces a second level of hierarchy without changing the reading rhythm. The profile supplies page geometry, running heads, folios, and restrained typography.

1.2 A short quotation

A reliable publication system should make ordinary pages feel ordinary, while keeping the production rules explicit.

The result is intentionally quiet: this profile is the starting point when a title does not need a more specialised semantic or presentational contract.

¹This synthetic footnote demonstrates the default note treatment.

Production Note

This generated starter contains synthetic text only. Replace it with project-owned content.
