CHAPTER 1

Infrastructure as a publication problem

Ada Example

Institute for Synthetic Studies

ORCID: 0000-0000-0000-0000

Abstract

This synthetic abstract demonstrates publication-unit metadata that remains independent of chapter-title typography.

Keywords: infrastructure; publishing systems; metadata

DOI: 10.0000/pse.synthetic.001

This synthetic chapter demonstrates a single chapter author. Contributor identity and affiliation are reused from the contributor registry.

1.1 A reusable relation

A contributor can be related to a publication unit without encoding that relation in the chapter title itself.

CHAPTER 2

Shared editorial work

Ben Example

Department of Demonstration

ORCID:

Cy Example

ORCID:

Abstract

Keywords:

DOI:

This synthetic chapter demonstrates two contributors attached independently to the same publication unit.

CHAPTER 3

Roles can differ by unit

Abstract

Keywords:

DOI:

This synthetic chapter demonstrates that role belongs to a contribution relation, not permanently to a person identity.

Contributor Note

Contributor identity is semantic data; chapter-credit typography belongs to the edited-collection profile.
